

For your next
adventure, Prashant?
Destinations and itineraries — all in one place.

GlobeTrotter

Smart Travel Planning & Itinerary Management Platform

Cockroach Coders | Darshan University

EXPLORE CITIES

FIND ACTIVITIES

VIEW

GlobeTrotter is an editorial-style travel platform that unifies the fragmented experience of planning multi-city journeys.

- **Consolidated Source:** Centralizes destinations, activities, and schedules.
- **Guided Process:** Leads users through a structured "Trip Architect" funnel.
- **Visual Planning:** Real-time trip previews and itinerary generation.
- **Financial Control:** Integrated budget tracking and target setting.

Fragmented Travel Planning

Disconnected Tools

Users juggle notes apps, spreadsheets, and calendars to manage a single trip.

Planning Complexity

Difficulty in organizing multi-city stops, durations, and activity sequences.

Cost Obscurity

Hard to visualize total estimated expenses against a target budget during planning.

The Friction Point

High cognitive load leads to planning fatigue, resulting in stressful travel experiences.

GlobeTrotter transforms abstract ideas into structured itineraries through an integrated ecosystem.

Discover

Find cities and local activities dynamically.

Build

A step-by-step Trip Architect for structure.

Finance

Target budget setting and visibility.

Share

Public URLs for read-only itinerary sharing.

Addressing Core Needs

Multi-City Explorers: Need to manage routing and durations across locations.

Activity Seekers: Need to curate specific tourist attractions into a schedule.

Budget Travelers: Need to ensure trips align with financial realities.

Digital Nomads: Need a portfolio of upcoming and past journeys.

View & Share Itinerary

The central hub for all travel activities, designed for high-glanceability.

- **Action Centers:** Plan a Trip, Explore Cities, Find Activities.
- **Next Adventure:** Dynamic preview of upcoming itineraries.
- **Quick Navigation:** Fast access to "My Trips" portfolio.
- **Visual Identity:** Clean editorial typography and travel imagery.

A multi-step funnel that removes the overwhelm of planning.

- **Step 1:** Narrative & Meta-data entry (Name, Masthead, Notes).
- **Live Summary:** Persistent panel tracking cities, places, and budget.
- **Contextual UI:** Clean forms with placeholder guidance.

The screenshot displays the 'Guided Trip Architect' web application interface. At the top, the 'GT GLOBETROTTER EDITORIAL HORIZON' logo is on the left, and navigation links for 'Dashboard', 'My Trips', 'Destinations', and 'Activities' are in the center. On the right, there are buttons for 'AI ARCHITECT' and 'PLAN TRIP', along with a user profile icon and a share icon. Below the navigation bar, a 'Back to My Trips' link is on the left, and a progress indicator shows '01 / 04' on the right. The main content area is titled 'GUIDED TRIP ARCHITECT • STEP 1 OF 4' and features a large heading 'What's the name of your journey?'. Below this, there are two input fields: 'TRIP NAME / MASTHEAD TITLE *' with the example 'e.g. Royal Rajasthan & Spiritual Ganges Tour' and 'TRIP DESCRIPTION / TRAVEL NOTES' with the placeholder 'Describe your trip aspirations, lodging ideas, or travel highlights...'. A 'NEXT STEP →' button is located at the bottom right of the main form. To the right of the main form is a 'LIVE TRIP SUMMARY PREVIEW' panel. This panel shows the title 'Untitled Journey', the dates '2026-06-12 - 2026-06-24', and a subtitle 'A multi-city travel itinerary created with GlobeTrotter.'. It also lists 'Selected Cities (2):' as 'Jaipur' and 'Varanasi', 'Selected Tourist Places (2):' as 'Amber Fort & Palace Tour' and 'Morning Ganga Aarti & Boat Ride', and a 'Target Budget:' of '₹35,000'.

Integrated search and selection for destinations and attractions.

- **City Selection:** Easy-to-use "chips" and search for adding stops.
- **Tourist Places:** Curated attractions attached to the trip stop.
- **Dynamic Preview:** Live updates of journey content.

The screenshot displays the 'GUIDED TRIP ARCHITECT' interface, specifically Step 2 of 4: 'Select Cities & Tourist Places (Jovalayak Sthal)'. The interface is designed for creating a trip itinerary. At the top, there's a navigation bar with links to 'Dashboard', 'My Trips', 'Destinations', and 'Activities'. Below this, a 'Back to My Trips' link is visible. The main section is titled 'GUIDED TRIP ARCHITECT • STEP 2 OF 4' and 'Select Cities & Tourist Places (Jovalayak Sthal)'. It includes a 'START DATE' (12-06-2026) and 'END DATE' (24-06-2026) section. Below this, a section titled '1. SELECT CITIES TO VISIT (2 SELECTED)' allows users to click chips to add or remove cities. A search bar is provided for adding new cities. The selected cities are 'Jaipur' and 'Varanasi'. A 'LIVE TRIP SUMMARY PREVIEW' on the right shows the trip details: 'giranar', dates '2026-06-12 - 2026-06-24', and a target budget of '₹35,000'. The preview also lists 'Selected Tourist Places (2)': 'Amber Fort & Palace Tour' and 'Morning Ganga Aarti & Boat Ride'.

Granular control over the trip's visibility and financial scope.

- **Estimated Budget Target:** Setting a ceiling for trip costs.
- **Visibility Toggle:** Switch between Public and Private modes.
- **Sharing:** Generate links for read-only access or cloning.

The screenshot shows the 'Set your budget & privacy controls' screen in the GlobeTrotter 'GUIDED TRIP ARCHITECT' interface, specifically 'STEP 3 OF 4'. The page features a header with the GT logo, navigation links (Dashboard, My Trips, Destinations, Activities), and buttons for 'AI ARCHITECT' and 'PLAN TRIP'. A 'Back to My Trips' link is in the top left, and a progress indicator shows '83 / 84' steps. The main content area includes a title 'Set your budget & privacy controls' and a 'TOTAL ESTIMATED BUDGET TARGET (₹)' of 35000. Below this is a 'VISIBILITY & SHARING MODE' dropdown menu currently set to 'Public (Generate shareable link & allow cloning)'. At the bottom are 'BACK' and 'NEXT STEP →' buttons. A 'LIVE TRIP SUMMARY PREVIEW' sidebar on the right displays trip details for 'giranar' (2026-06-12 to 2026-06-24), selected cities (Jaipur, Varanasi), and selected tourist places (Amber Fort & Palace Tour, Morning Ganga Aarti & Boat Ride), with a 'Target Budget' of 135,000.

Conversion of preferences into a chronological journey view.

- **Journey Route:** Multi-city stop visualization.
- **Transit Markers:** Geographical routing indicators.
- **Daily Schedule:** Day-by-day activity breakdown.

Comprehensive management of every journey planned.

- **Categorized:** Upcoming, Drafts, and Completed journeys.
- **Visibility:** Clear Public/Private status badges.
- **Quick Tools:** Search, filter, and edit trips easily.

A portal for global city and attraction discovery.

- **Popular Cities:** Quick selection chips for top destinations.
- **Smart Filters:** Browse by cost and regional categories.
- **Discovery Engine:** Instantly find attractions and landmarks.

Granular activity discovery via Geoapify integration.

- **Categories:** Sightseeing, Food, Culture, Adventure, Nature.
- **Contextual Data:** Real-time points of interest.
- **Place Cards:** View location, description, and estimated cost.

A view of the traveler's identity and achievements.

- **Stats:** Trips Created, Cities Logged, Activities Done.
- **Verification:** "Verified GlobeTrotter Explorer" status.
- **Personal Details:** Account management and settings.

The screenshot displays the user profile for Prashant Sharma on the GlobeTrotter platform. The header includes the GT logo, the name GLOBETROTTER with the tagline EDITORIAL HORIZON, and navigation links for Dashboard, My Trips, Destinations, and Activities. Utility links for AI ARCHITECT and PLAN TRIP are also present, along with a user profile icon and a share icon.

The main profile section features a circular profile picture placeholder, the name Prashant Sharma, the email valaprashant9793@gmail.com, and a VERIFIED GLOBETROTTER EXPLORER badge. To the right, three statistics are shown: 3 TRIPS CREATED (with an airplane icon), 8 CITIES LOGGED (with a city skyline icon), and 6 ACTIVITIES DONE (with a calendar icon).

Below the stats is a 'Required Personal Details' section with four input fields:

Required Personal Details	
FULL NAME *	EMAIL ADDRESS *
Prashant Sharma	valaprashant9793@gmail.com
PHONE NUMBER *	HOME LOCATION / COUNTRY *
+91 98765 43210	Mumbai, India

A unified JavaScript ecosystem selected for performance and scale.

Frontend

React.js, Vite, Axios,
React Router, CSS

Backend

Node.js, Express.js
(RESTful API)

Database

MongoDB, Mongoose
(Document Store)

Security

JWT, Google OAuth
2.0, Protected Routes

Why this stack?

MongoDB's document model fits non-uniform itineraries, while React/Vite provides a fast UI experience.

Guided Logic Funnel

Custom state-management ensuring data integrity throughout a 4-step creation process.

Integrated Discovery

Server-side aggregation of destination data for zero-latency selection.

Enterprise Security

Authentication using industry-standard JWT and social OAuth protocols.

Before

- × Scattered notes and apps
- × Manual itinerary building
- × Budget uncertainty

After

- ✓ Unified planning hub
- ✓ Visual, structured itineraries
- ✓ Financial target clarity

Explore the product and implementation through our GitHub repository.

GitHub Repository

<https://github.com/prtspndy/GlobeTrotter.git>

Complete MERN-stack implementation with functional discovery, budgeting, and sharing.
